POLISHED FINISH

WHITEMATTE Quartz Surface is non-porous and resistant to staining. Routine cleaning should be done with warm water and a sponge or dishcloth. This helps prevent the formation of mineral deposits from "hard water." Water softeners can also contribute to the accumulation of mineral deposits. Always clean up water splashes and drips promptly to prevent the formation of these mineral deposits, especially in areas around faucets. A small amount of dishwashing detergent, a microfiber cloth, or a cloth suitable for non-stick cookware can assist in cleaning up spills or splashes.

For best results, it is important to wipe the surface instead of scrubbing it, rinse with clean water, and dry it with a clean cloth to achieve the best appearance. Splashes, spills, and water-marks can also be cleaned with household cleaning products.

Always read and follow the manufacturer's instructions on the label. After cleaning the surface, for WHITEMATTE, it is important to rinse it with clean water and polish it with a clean, dry cloth (Microfiber materials work well). Do not use abrasive cleaners.

BOOK MATCHING

Continuous slab refers to the way quartz surfaces are used on large areas. Imagine you want to cover your kitchen countertop or a large island. Continuous slab is useful in such cases because a large quartz slab is used without interruptions. This results in a smoother and more elegant appearance without any cutting or joining on the surface. In other words, there are no seams or joints on your surface, which provides both aesthetic and cleanliness advantages.

CONTINIUS SLAB

Book matching is a design technique used in the cutting of quartz or natural stone. Imagine

that you are thinking of two large stone slabs like an open book. This ensures that both sides of the quartz or natural stone patterns are perfectly matched. The result creates a visually appealing and symmetrical pattern on the surface. Book matching is a method you can use when you want to create a stylish and attention-grabbing design on countertops, floors, or wall coverings.
